Resonant soft x-ray scattering and
charge density waves in correlated
systems

The work described in this thesis was performed in the Surface Science Group (part of the Materials Science Centre) at the Solid State Physics Laboratory of the University of Groningen, the Netherlands. The project was supported by the Dutch Foundation for Fundamental Research on Matter (FOM) with financial support from the Dutch Organization for the Advancement of Pure Research (NWO), the U.S. Department of Energy, the National Science and Engineering Council of Canada, the Canadian Institute for advanced research in quantum materials and the Canadian foundation for innovation.

RIJKSUNIVERSITEIT GRONINGEN

Resonant soft x-ray scattering and charge density waves in correlated systems

Proefschrift

ter verkrijging van het doctoraat in de
Wiskunde en Natuurwetenschappen
aan de Rijksuniversiteit Groningen
op gezag van de
Rector Magnificus, dr. F. Zwarts,
in het openbaar te verdedigen op
vrijdag 10 februari 2006
om 14.45 uur

door

Andrivo Rusydi

geboren op 19 januari 1976
te Padang
(Indonesie)

Beoordelingscommissie: Prof. Dr. Chi-Chang Kao
Prof. Dr. T. Palstra
Prof. Dr. S. van Smaalen

To: my parents and my wife

Contents

1. Introduction.....	3
1.1 Strongly correlated system.....	3
1.2 High-temperature superconductors.....	10
1.3 Hole crystallization in Cu-O systems.....	12
1.4 One-dimensional electronic system: $2k_F$ and $4k_F$ instability.....	15
1.5 Resonant (soft) x-ray scattering (RSXS).....	16
1.6 Scope.....	23
References.....	24
 2. Experimental section: ultra high vacuum (UHV) scattering chamber and the X1B-NSLS Beamline.....	 29
2.1 History of x-rays and synchrotron radiation.....	29
2.2 X1B beamline at National Synchrotron Light Source (NSLS).....	32
2.3 Ultra high vacuum (UHV) scattering chamber.....	33
References.....	38
 3. Testing the technique: Resonant soft x-ray scattering.....	 39
3.1 Intrinsic inhomogeneity in epitaxial $\text{La}_2\text{CuO}_{4+\delta}$ films.....	39
3.1.1 Introduction.....	40
3.1.2 Enhancement of the structural modulation as seen at the Cu L edge....	41
3.1.3 Inhomogeneity of Oxygen in $\text{La}_2\text{CuO}_{4+\delta}$	50
3.1.4 Superstructure reflection.....	56
3.2 Zooming-in on the charge ordering in $\text{YBa}_2\text{Cu}_3\text{O}_{6.5}$	61
3.3 The incommensurate structure modulation of the single crystal $\text{Bi}_2\text{Sr}_2\text{CaCu}_2\text{O}_{8+\delta}$ superconductor and a phase difference between regular and resonant scattering in RSXS.....	67
3.3.1 The incommensurate structure modulation.....	68
3.3.2 A phase difference between regular and resonant scattering.....	71
References.....	75
 4. Direct evidence of Wigner crystallization in ladders and $4k_F$ charge density wave in chains in copper-oxide spin ladders of $\text{Sr}_{14}\text{Cu}_{24}\text{O}_{41}$.....	 77
4.1 Theory and general properties.....	77
4.2 Sample preparation	83

4.3	Crystallization of charge holes in the ladder of $\text{Sr}_{14}\text{Cu}_{24}\text{O}_{41}$	84
4.4	Number of holes associated with the hole crystallization.....	90
4.5	Superstructure in the chains of $\text{Sr}_{14}\text{Cu}_{24}\text{O}_{41}$	90
	References.....	96
5.	An Interpretation of X-Ray Absorption on the spin ladder of	
	$\text{Sr}_{14-x}\text{Ca}_x\text{Cu}_{24}\text{O}_{41}$	99
	References.....	113
6.	Commensuration effects on the Wigner crystallization in the ladders and	
	mechanism of charge density wave in the chains of the doped ladder in	
	$\text{Sr}_{14-x}\text{Ca}_x\text{Cu}_{24}\text{O}_{41}$	115
6.1	Introduction.....	115
6.2	Wigner Crystallization in Spin Ladders of $\text{Sr}_{14-x}\text{Ca}_x\text{Cu}_{24}\text{O}_{41}$	118
6.3	Evidence for a different energy for the excitation of $\text{O}(l)$ and $\text{O}(r)$ in ladder.....	127
6.4	x -dependence of the superstructure peak in the chains.....	130
	References.....	134
7.	Charge character of the static ‘stripe’ phase in $\text{La}_{15/8}\text{Ba}_{1/8}\text{CuO}_4$.....	137
7.1	Introduction.....	137
7.2	Experimental results and discussions.....	140
	References.....	147
	Summary.....	149
	Samenvatting.....	155
	Publications.....	161
	Acknowledgements.....	163
